

ROBAX® fire-viewing panels / glass

by SCHOTT

ROBAX® fire-viewing panels

Flat ROBAX® panels offer clear views and a long product life. These are available as random sheets or cut-to-size panels. Random sheets are 1,954 x 1,100 mm in size with 4 mm or 5 mm thickness, and serve as base material for cut-to-size panels.

Cut-to-size panels are available in a wide range of sizes in thicknesses of 4 mm or 5 mm. They are finished according to your wishes, come with edge processing, and may have decoration or other specialties depending on your requirements. The clean, simple style of flat ROBAX® panels delivers increased functionality.

Product advantages

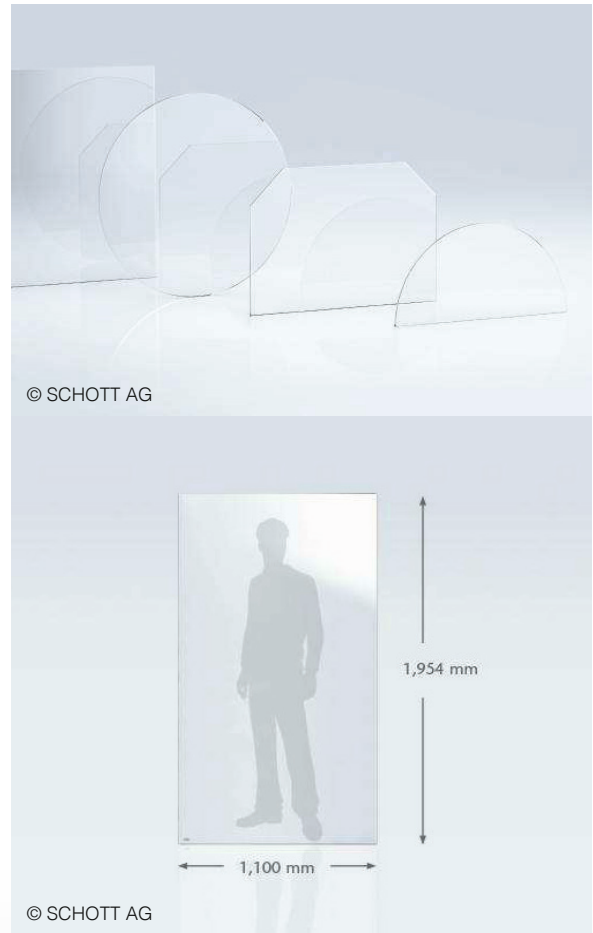

High-quality silky matt appearance.

Minimal natural coloring enhances view of the fire. Many different formats available, such as round cut-to-size panels.

Special treatments also available, including decoration to hide construction elements or for design reasons. We can also provide boreholes, as well as inner and outer cut-outs.

Pape Strahlenschutz GmbH
